

## FACILITIES PLANNING

### DESIGN OF NEW FACILITIES

In its responsibility to provide adequate buildings and equipment for the school district, the Board shall carefully consider the feasibility of any new or refurbished construction. If necessary, the Superintendent, at his/her discretion, may seek counsel and advice from qualified professional personnel to assist with the planning and/or design of new schools and/or renovations to existing buildings for Board approval.

### PLAQUES ON BUILDINGS

Plaques on buildings shall bear the names of those School Board members in office at the time of accepting the building, the name of the Superintendent, the architectural firm, and the contractor. Further, due recognition shall be given to the contributions made in its development by all School Board members and former superintendents who held office since the hiring of architects to develop the project or building.
