Engage, Educate and Empower Every Student, Every Day

PRESS RELEASE

12/18/2023

CHEVRON CORPORATION AWARDS TPSD \$ 50,000 GRANT

Terrebonne Parish School District (TPSD) recently received a \$50,000 grant from Chevron Corporation. Chevron has supported TPSD for multiple years focusing on STEM (Science, Technology, Engineering, Art, and Mathematics). Thanks to Chevron, this grant will allow TPSD to support STEAM through sponsored field trips to Louisiana Art and Science Museum. The STEAM field trips allow students to explore real-world applications of the material that they are learning in the classroom, expanding their understanding and engagement with the subject matter. Grant funds will also be used for teachers to attend the National Science Teachers Association (NSTA) Conference to be held locally in New Orleans, LA in the fall of 2024. Professional development gives educators the tools and skillset to deliver high-quality, standards-aligned instructional materials in a way that keeps students stimulated and helps them master the subject. TPSD is grateful for the continued support Chevron has given over the years.

Chevron is committed to supporting organizations, programs, and events which reinforces their business and social investment focus areas: economic development, environment, health, and STEAM education.
